## VICTORIA PALACE HOTEL ENVIRONMENTAL CHARTER

*"Because we want to save our planet.  
Because we want the Victoria Palace to last for at least another century.  
Because we care about the Earth our children will inherit from us.  
Because it's important to be an actor and not a spectator.  
Because we want to involve our employees, our partners as well as our guests.  
Because every action counts..."*

*Mélodie FLANAGAN SALAMA, Marketing Director*

Information is the key, consequently, we do our utmost to make our guests and our staff aware of waste sorting, saving energy and other eco-friendly practices.

We also raise awareness our partners, so we can all become eco-citizens from around the world.

The Victoria Palace is a place where we have banned single use plastic, without sacrificing the quality of our services. Our cosmetic products in our bathrooms are refillable bottles in order to avoid individual plastic bottles. Zero plastic bottle : we offer our guests filtered water in glass bottles which are renewed every day.

Our taps and showers are all equipped with a water regulator to limit the flow of water without altering the pressure. All our toilets are equipped with economical flushes with 2 flows. We invite our guests to reuse their bath towels in order to reduce water waste.

The Victoria Palace is equipped with LED bulbs, with a low power consumption. All our rooms are equipped with double-glazed windows, and with an electricity saver. Our air-conditioners turn off automatically if the window is open, or when the key is not in the electricity saver. The Victoria Palace is equipped with presence sensor in public areas.

The Victoria Palace sorts and recycles its wastes. All our rooms features sorting bins so our guests are able to sort their wastes as well.

We don't like wastage at the Victoria Palace. So we are member of Too Good To Go, the app that helps to reduce food waste. Our cleaning products are eco-friendly. We do not use any pesticide for the plants our terrace, but natural products, such as black soap.

The Victoria Palace works as much as possible with partners having the same eco-friendly vision as us. The wellness of our team is very important to us. Because the well-being in the workplace is also part of the improvements for a better world.
